

FIRST TIME TRACTOR *BUYER?*

Here's How to Start **Blue** with Confidence at Jay's Ag and Turf

Have you ever found yourself wishing you had a tractor to handle projects around your property—but you've never owned one and don't know where to start? You're not alone. At Jay's Ag and Turf in Reedsburg, WI, we help first-time buyers every day, and we proudly recommend LS Tractors. They're affordable, powerful, and beginner-friendly—but durable enough to grow with you over the years. Here's a simple guide to help you make your first tractor purchase with confidence.

UNDERSTAND YOUR PROPERTY AND YOUR **NEEDS**

Before you do anything else, take a close look at your property. Consider its size and terrain—whether it's flat, hilly, or wooded. Think about the types of tasks you'll be handling on a regular basis. Will you be mowing large lawns, hauling loads of gravel or mulch, lifting materials, removing snow in the winter, or tilling a garden? Also, don't forget practical considerations like whether your tractor needs to fit through gates, barn doors, or other tight spaces. Your answers will help determine the right horsepower, size, and set of attachments needed for your tractor to perform efficiently.

CHOOSE THE RIGHT **LS TRACTOR MODEL.**

Jay's Ag and Turf carries a wide range of LS Tractors to meet various needs. For smaller properties and tight areas, the Sub-Compact MT1 Series (21–25 HP) is a great starting point. These models are ideal for homeowners, hobby farmers, and ranchers who need something easy to operate with essential features. If you're looking for a bit more muscle, the Small Compact MT2S (25 HP) offers better performance for tasks like hauling, mowing, and other light-duty work. For those taking on more demanding jobs, the Compact MT2 and MT3 Series (25–57 HP) are efficient workhorses suited for snow removal, road upkeep, or light crop production. If your needs are more intensive—such as tilling large plots, baling hay, or heavy material handling—the Utility MT4 through MT7 Series (58–101 HP) provide the power and durability needed for serious commercial or agricultural work.

EQUIP YOUR TRACTOR WITH THE RIGHT ATTACHMENTS

A tractor is only as good as the tools it can run. That's why LS offers a broad lineup of attachments to enhance your machine's capabilities. Whether you need a front end loader for moving mulch or gravel, a backhoe for digging and trenching, a rotary cutter or mower for clearing brush and maintaining lawns, or a box blade and land grader for leveling driveways and trails, there's a tool for nearly every job. You can also equip your LS with grapples for lifting logs and stumps, tillers for prepping garden beds, or snow blowers for those tough Wisconsin winters. If you're unsure of which implements to choose, our team at Jay's will walk you through the best options based on your land and workload.

UNDERSTAND YOUR FINANCING OPTIONS

When it comes to cost, we understand that buying a tractor is a significant investment. That's why we offer competitive financing options, like \$0 down and 0% interest for up to 120 months for qualified buyers. Whether you're ready to buy today or just starting your search, our financing plans can help you find a solution that fits your budget. As a helpful tip, we recommend making a list of both your immediate tasks and long-term goals so we can better match you with the right tractor and features. Always be sure to check what the current promotions are as they do change from month to month.

WHY BUY FROM JAY'S AG AND TURF?

So why buy from Jay's Ag and Turf? We're a family-owned dealership committed to honesty, excellent service, and making sure you get exactly what you need—without the pressure. Our lot features a large, in-stock inventory of LS Tractors with transparent pricing, fast and friendly service, and reliable maintenance support. We also welcome trade-ins. Whether you're maintaining five acres near Baraboo, clearing snow in Wisconsin Dells, or running a hobby farm in the Driftless Area, we're here to help.
